

TROJAN SPECIALTY PRODUCTS

TROJAN'S GRAVITY FLOW 'WATERSAVER' NIPPLE CONNECTOR KIT

Excellent, Efficient and Quick Way to connect a Watering Nipple to any Barrel, Pipe or Stocktank.

The Nipple Connector Has Hexagonal / Splined Body Design For Fast, Easy Installation and Removal

- 1. Sealing Ring and Groove
- 2. Locknut Design
- 3. Sharper and Deeper Teeth
- 4. Hexagonal / Splined Body Design
- 5. Precision Machined Tapered Threads
- 6. Insulated Throat

Sealing Ring and Groove

- Sealing ring resists buckling or slipping during installation
- Sealing ring is designed to provide a complete 360° seal, even when it is not perpendicular with your barrel

Locknut Design

- Locknut enables easy application of torque with wrench
- Sharper and deeper teeth to penetrate bite improve bonding
- Precision machined tapered threads designed to create water tight union

Simply use a plastic or metal barrel or PVC Pipe and drill a 7/8 inch hole in the side. Install the Gravity Flow Nipple Connector and locknut. Then screw in the Model 75 Nipple using pipe thread tape or pipe dope. You now have a Gravity Flow Nipple to water your animal.
